Forecast for Saturday 05 Sep 2020

Weather: Generally dry during the early hours of Saturday morning, with some clear spells. Isolated light rain showers will quickly develop during the morning, with some bright or sunny intervals. The showers may become a little more frequent and heavier during the afternoon and evening, however there will be some good dry interludes too.

Chance of cloud free mountain/hill tops above 600m: 90% or better, with only occasional scraps of cloud developing near 800m in showers.

Visibility: Generally very good with clear views of distant hills, but deteriorating to locally moderate in showers, and occasionally very poor on the highest routes when any cloud covers the summits.

Forecast for Sunday 06 Sep 2020

Weather: Clear spells and scattered showers during the early hours of Sunday, but with a drier interlude likely around dawn. Further showers will develop by mid-morning and continue through the afternoon with the odd heavier one possible before the die away late in the day to leave a dry evening with clearing skies.

Maximum wind: West to northwest 15-20mph gust 25mph.

Chance of cloud free mountain/hill tops above 600m: 90% during before dawn, then deteriorating to 40% by mid-morning with areas of cloud developing near 600m. Improving to 90% or better by early afternoon as cloud lifts, with only scraps of cloud around 800m in showers. Becoming 100% for the evening as cloud largely clears.

Visibility: Generally very good with clear views of distant hills, but deteriorating to locally moderate in showers, and occasionally very poor on the highest routes when any cloud covers the summits.

Temperature: **Valleys:** Plus 8 Celsius becoming Plus 16 Celsius.
At 600m: Plus 8 Celsius becoming Plus 10 Celsius.
Freezing level: Above the summits.
